

# Pressure Flushing Rig

## DESCRIPTION

The **CEL Model 50000** Pressure Flushing Rig is designed to the exact standards required for flushing and reverse flushing components with oil cavities, galleries and passages subsequent to repairing and machining in accordance with their respective CMMs.

This Rig is capable of pressurising and delivering petroleum solvent under constant flow and pressure. The rig consists of a powder coat painted enclosure, the necessary plumbing, pressure gages, pressure pump with adjustable drive, and a pressure relief valve to maintain pressures up to 100 PSI.

## MAIN FEATURES

The **CEL Model 50000** Pressure Flushing Rig includes the following features:

- ✓ Pressure control
- ✓ Stainless steel tubing, tank and drip tray
- ✓ Low level warning
- ✓ Emergency shutdown
- ✓ Easy to use operator interface
- ✓ Stable flow pump with TEFC motor with Variable Frequency Drive (VFD)
- ✓ Adjustable levelling pads
- ✓ Easily removable doors all around the stand for access to components
- ✓ **CE** (European Conformity) compliant
